

Dear clients,

We would like to let you know of the event that was held in Seoul, South Korea to introduce the new range of Saez luffing-jib tower cranes to the Korean clients.

The presentation was organized by the official Saez dealer for Korea, **Shinwoo Development Company**, and the main players in the construction industry were invited to the event.

We would like to share with you some of the pictures of what was a very successful occasion.

Hoping that you like them, with best regards.
